

SHAHAR ARIEL

B.Sc. in Software Engineering | Full Stack & Mobile Developer

ShaharAriel95@gmail.com | 050-880-2266 | [LinkedIn](#) | [GitHub](#) | [Website](#)

Languages: Hebrew (native), English (fluent)

Profile

Full Stack Developer with production experience across web and mobile platforms. Specialized in JavaScript ecosystems with Vue.js, PHP, MySQL, and AWS. Hands-on ownership of mobile deployment pipelines through Google Play Console and Apple Developer Console. Background includes building scalable exam systems, cloud-based platforms, and maintaining production applications across web and mobile.

Work Experience

2024 – 2026 | Tomax – Digital Assessment Platform | Full Stack Developer

- Developed and maintained an online examination system using **Vue.js**, **PHP**, and **Electron**.
- Designed and implemented **analytics** and a BI layer for exam data, enabling operational monitoring and decision support.
- Built and maintained the company's mobile application using **React Native**.
- Managed mobile deployment and releases via Google Play Console and Apple Developer Console.
- Integrated backend services with **MySQL** and **AWS** infrastructure.
- Designed and integrated AI-based question generation and question rewriting features using AWS Bedrock.

2023 – 2024 | Uniper-Care – Connected Living Platform | Full Stack Developer

- Developed and integrated new platform features using **Node.js**, **Angular**, **Vue.js**, and **MongoDB**.
- Built and deployed a WhatsApp-based communication system for user reminders and assistance.
- Implemented and maintained **Twilio** integration for messaging delivery and reliability.
- Maintained and enhanced cloud-based services and platform scalability.

2021 – 2022 | Percepto Robotics – Autonomous Inspection Systems | Technical Support Engineer

- Resolved software and hardware issues for industrial robotics systems deployed worldwide.
- Performed Linux-based log analysis and debugging using Bash.
- Developed automated pre-shift validation checks for drone fleets, reducing manual inspection and accelerating deployment readiness.

2019 – 2020 | Kedma Ltd. – Marketing & Export Management

- Managed international marketing and export operations.

2016 – 2017 | Elbit Systems (IDF Service) | software tester

- Performed manual testing of military software systems.
-

Education

2020 – 2024 | B.Sc. in Software Engineering | Shenkar College – Engineering faculty.

Projects & Technical Skills

Technical Skills

- **Languages:** JavaScript (ES6+), PHP, Python, SQL, HTML5, CSS3.
- **Frameworks:** Vue.js, React Native, Angular, Node.js.
- **Cloud & Databases:** AWS, MySQL, MongoDB.
- **Tools & Delivery:** Google Play & Apple Developer Consoles, Linux (Bash), Git.
- **Architecture:** OOP, RESTful APIs, MVC, CI/CD Pipelines.

Final Project – SignMyName

Educational application for teaching Israeli Sign Language using **deep learning** and **computer vision**.

- Gesture recognition using **CNNs**
- **TensorFlow, OpenCV, MediaPipe, Tkinter.**
- Real-time ML-based interaction design

Military Service

2016 – 2017 | Faculty Instructor – Armored Corps

- Responsible for professional training in command-and-control systems.

2014 – 2016 | Tank Commander – Armored Corps

- Combat service in operational units.

ADDITIONAL INFORMATION

2020 – 2021 | Mitchashvim – hardware and software support

- coordinated computer acquisition and distribution.
